# sight village

Welcome to our first Sight Village e-catalogue!

This catalogue brings together some festive special offers from a small selection of exhibitors. Most discounts are on offer for a limited period so be sure to check the dates and place your orders in good time.

It has been a strange year and we have missed being out and about and seeing you all at our regional events. We have done our best to keep in touch via our newsletters and online but nothing will replace the buzz of an actual event, so we are eager to get back on the road and see you all again.

We are hopeful that we will be able to host events by late spring and we have a full calendar planned - all event dates and venues are listed in this catalogue. We want to reassure you that we will continue to monitor the situation in relation to COVID-19 closely and obviously will adhere to all government guidelines. We will take all measures possible to ensure that everyone feels confident to attend an event; safety is our priority.

We will be holding an online Sight Village Information Event on 19<sup>th</sup> & 20<sup>th</sup> January where some of our exhibitors will bring you up to date with what's new and provide information about product updates. There will be a Q&A session with representatives from the organisations taking part and we would love to have you on board.

The Sight Village team will also be able to answer any questions you may have about Sight Village and we would love to hear your views about future events.

More information will be sent to you about this soon however; if you would like to send your thoughts and questions about Sight Village to us before the event please email: [sv@qac.ac.uk](mailto:sv@qac.ac.uk)

Finally, we look forward to a more positive New Year and a busy 2021. In the meantime, Lottie and Karen send you best wishes for the festive season. *See you soon!*

## **Sight and Sound Technology - Headline Sponsor**

Sight and Sound technology are the UK's leading provider of hardware and software to the blind, partially sighted and those with learning and reading difficulties. By working in unison with private individuals, charitable organisations, educational establishments and commercial enterprises we help our users fully unleash their potential.

Our product solutions have been specifically designed to improve quality of life at work, at study or in the home and our commitment to continuous product refinement and innovation means that our solutions are the best available.

What's more, they're simple to install and easy-to-use systems and our specialist trainers are all fully accredited in each of the software titles that they support allowing us to offer a personalised service to each of our customers to provide the best solution to assist you in your day to day activities.

[www.humanware.com](http://www.humanware.com)

**Taira Technology is a company that provides products and services for visually impaired people.**

### **Some of the products and services we offer include:**

- Advice on sourcing the best products for your needs (such as accessible software, braille displays, daily living aids, phones, tablets and other technology).
- Training and technical support (via telephone or in person).
- Accessible websites designed to your specifications.
- Braille transcription services.
- Accessible talking mobile phones with or without buttons.
- Computers, laptops, and tablets fully configured to your needs.
- TVOnics and Goodmans set-top boxes (sales, repairs and upgrades).
- Specialist tactile accessories for iPhones.
- Product repairs and upgrades.

### **BlindShell Classic**

Do you struggle to use touch screens? Do you want a mobile phone with buttons with modern features? The BlindShell Classic could be the answer.

The BlindShell Classic mobile phone is an easy to use 4G mobile phone (available in black or red). The phone is operated via the easy to feel, tactile physical keypad or by using your voice. Feedback is provided by the built-in synthetic voice, vibrations and additional acoustic signals. The phone will enable you to check emails, access YouTube, listen to audio books, read e-books, make text and voice notes, store appointments in an accessible calendar, check the weather, access internet and FM radio stations, and much more!

Order before the end of 2020 and receive a 32GB micro SD card worth £19.99, 3 hours training on arrival, and an extended 24 months warranty.

**Price: £299.99**

## 6Dot Label Maker

Have you ever struggled to emboss Braille labels using a Dymo gun? Do you want an easy to use solution? We have the ideal product for you!

The 6Dot Label Maker is an electronic labeller which can produce Braille labels on 9MM Dymo tape. Use the built in Perkins keyboard to type in any grade of Braille in any language or use the included QWERTY braille keyboard to produce labels if you do not know Braille. Powered by 6 AA batteries (included), or via the mains.

Order before the end of 2020 and receive 10 free rolls of Dymo tape worth £29.99, and a free qwerty keyboard worth £19.99.

**Price: £575**

## SpeedDots Cover

Many visually impaired people find an iPhone or iPad difficult to use because of the lack of tactile markings on the screen. If you are one of these people, this product is for you!

The SpeedDots cover is a clear, see through screen protector (with tactile dots) which you can apply to your iPhone or iPad's touch screen. While Apple has done a great job making touch screen devices fully accessible to blind and visually impaired users, by placing raised dots on the surface of the screen in a few key locations, such as the keyboard and number pad, this can help people input text and information accurately and confidently!

You do not need to know braille to use this product. Order before the end of 2020 and receive a free getting started audio guide.

**Prices start from £19.99**

---

If you are interest in any of our products or services, please do not hesitate to contact us. We are friendly, approachable and our customer service is second to none.

We are here to advise and support you to regain your independence.

## Are you struggling with your magnifying glass?

A handheld electronic magnifier may be the solution for you.

- Adjustable magnification levels
- Clear crisp image

## Would you like your post read out loud to you?

A text to speech reading device may be the solution for you.

- Easy to use
- Instant response from any text

## Unable to see loved ones?

A wearable magnifier could change that.

- Watch TV
- Do much loved hobbies again

Please call us for a large print paper copy of our latest catalogue or to speak to one of our friendly advisors.

A woman with dark hair, wearing a black t-shirt and blue jeans, is shown in profile from the waist up. She is holding a white cane in her right hand. The background is dark blue with white snowflakes and a string of white lights at the top. There are also Christmas decorations like a gift box, a candy cane, and a bell.

Freedom  
Scientific

Optelec

SCHWEIZER

**Acrobat Ultra 20"** is a complete system featuring a 3-in-1 HD camera with a 20" high resolution HD LCD producing maximum picture detail for clear, vivid colour display.

It's our most flexible solution for reading, writing or viewing magnified images at any distance. Use it up close like a mirror for applying makeup or other personal grooming.

The **Acrobat Ultra** is a one piece machine, simply remove from the box, plug in and you're good to go.

The high, moveable camera on the **Acrobat Ultra** makes writing, hobbies and tasks much easier than most other electronic magnifiers.

Remain independent over Christmas and the Winter months with this popular magnifier.
